CHAPTER SIX

Soil Mineralogy Changes With Different Agricultural Practices During 8-Year Soil Development From the Parent Material of a Mollisol

Y.-L. Liu[*,†,1], S.-H. Yao[‡,1], X.-Z. Han[†,2], B. Zhang[†,‡,2], S.A. Banwart[§]

Contents

1. Introduction 144
2. Material and Methods 147
   2.1 Study Site and Experimental Design 147
   2.2 Soil Sampling and Analysis 148
   2.3 Soil Clay Mineralogy Analysis and Quantification 150
   2.4 Statistical Analysis 151
3. Results 152
   3.1 Soil Physiochemical Properties 152
   3.2 Identification of Clay Minerals 155
   3.3 Clay Mineral Types and Content 155
   3.4 Composition of Clay Minerals 160
4. Discussion 162
   4.1 The Relation of Clay Mineralogy to Clay Particle Size 164
   4.2 Effects of Agricultural Practices on Clay Mineralogy 166
   4.3 Effects of Soil Organic Matter on Clay Mineralogy 168
   4.4 The Relationship Between Soil Depth and Clay Mineralogy 172
